q(a) across all epochs, fiducial LCDM
radiation: q = 1
matter: q = 1/2
de Sitter: q = -1
deceleration parameter q
scale factor a
Acceleration transition for constant w
onset of acceleration (LCDM)
z = 0.632 (analytic, radiation neglected: z = 0.632)
w = -1.0
w = -0.8
w = -1.2
no dark energy
q(z)
redshift z
