Cosmic timeline with epistemic status of each epoch
today (13.8 Gyr)
Planck era: classical GR not applicable
Inflation (Starobinsky-type model; duration only)
Reheating (T_reh unconstrained between here and ~MeV)
Electroweak and QCD crossovers
Neutrino decoupling, e+- annihilation
Nucleosynthesis window (network not run)
Radiation domination
Matter domination
Recombination / last scattering
Structure formation (qualitative, not computed)
Lambda domination and acceleration
Far future: conditional on constant Lambda
status
Established theory
Computed by this code
Approximate, stated validity
Model-dependent
Speculative / unresolved
